

**Amendments to the Claims:**

Please amend claims 1, 3, 9, 10, and 17, and delete claim 2 as follows. This listing of claims will replace all prior versions and listings of claims in the application:

**Listing of Claims:**

1. (Currently Amended) A modular base for an industrial machine, comprising:
  - a mounting table adaptable to ~~be releasably connected to~~ support said industrial machine;
  - ~~means for adjusting the position of said mounting table; and~~
  - a plurality of legs connected to said mounting table;
  - a plurality of rollers connected to said legs for rollably moving said mounting table to a desired location; and
  - means adaptable for releasably securing said mounting table to a foundation.
2. (Canceled)
3. (Currently Amended) The modular base stated in claim 1, ~~wherein said adjusting means further comprises comprising:~~
  - a plurality of telescopically adjustable legs connected to said mounting table for adjustably positioning said mounting table at a desired height.
4. (Original) The modular base stated in claim 1, wherein said means for releasably securing

further comprises:

a plurality of mounting platforms coupled to said mounting table and adaptable to be releasably fixtured to a foundation.

5. (Original) The modular base stated in claim 1, further comprising:

a light fixture connected to and extending from said mounting table and adaptable to cast light onto said industrial machine.

6. (Original) The modular base stated in claim 1, further comprising:

a programmable controller coupled to said mounting table and adaptable to be in communication with said industrial machine.

7. (Original) The modular base stated in claim 6, further comprising:

a control panel coupled to and in communication with said programmable controller and adaptable to manipulate said industrial machine.

8. (Original) The modular base stated in claim 1, further comprising:

a pneumatic controller coupled to said mounting table and adaptable to communicate with said industrial machine.

9. (Currently Amended) A modular base for an industrial machine, comprising:

a mounting table adaptable to ~~be releasably connected to~~ support said industrial machine;

a plurality of telescopically adjustable legs connected to said mounting table for adjusting the height of said mounting table;

a plurality of rollers connected to said legs for rollably moving said mounting table to a desired location; and

a plurality of mounting platforms connected to said legs and having a plurality of apertures extending therethrough wherein said apertures are adaptable to receive a plurality of fasteners for releasably securing said mounting platform to a foundation.

10. (Currently Amended) The modular base stated in claim 9, wherein said mounting table further comprises:

a substantially U-shaped plate fabricated from a hardened steel wherein said open end of said U-shaped plate is accessible to a user.

11. (Original) The modular base stated in claim 9, further comprising:

an electric drive coupled to each of said adjustable legs for driving the telescopic adjustment of said legs.

12. (Original) The modular base stated in claim 9, further comprising:

said rollers adjustably connected along the height of said legs.

13. (Original) The modular base stated in claim 9, further comprising:

a light fixture connected to and extending from said mounting table and adaptable to cast light onto said industrial machine.

14. (Original) The modular base stated in claim 9, further comprising:  
a programmable controller coupled to said mounting table and adaptable to be in communication with said industrial machine.

15. (Original) The modular base stated in claim 14, further comprising:  
a control panel coupled to and in communication with said programmable controller and adaptable to manipulate said industrial machine.

16. (Original) The modular base stated in claim 9, further comprising:  
a pneumatic controller coupled to said mounting table and adaptable to communicate with said industrial machine.

17. (Currently Amended) A modular base for an industrial machine, comprising:  
a hardened steel, plate-like mounting table adaptable to ~~be releasably connected to~~ support said industrial machine;  
a plurality of telescopically adjustable legs connected to said mounting table for adjusting the height of said mounting table;  
an electric drive coupled to each of said adjustable legs for driving the telescopic adjustment of said legs;  
a plurality of castor wheels adjustably connected along the height of said legs for rollably moving said mounting table to a desired location; and  
a plurality of mounting platforms connected to said legs, and said mounting platforms

having a plurality of apertures extending therethrough wherein said apertures are adaptable to receive a plurality of fasteners for releasably securing said mounting platforms to a foundation.

18. (Original) The modular base stated in claim 17, further comprising:

a light fixture connected to and extending from said mounting table and adaptable to cast light onto said industrial machine.

19. (Original) The modular base stated in claim 17, further comprising:

a programmable controller coupled to said mounting table and adaptable to be in communication with said industrial machine.

20. (Original) The modular base stated in claim 19, further comprising:

a control panel coupled to and in communication with said programmable controller and adaptable to manipulate said industrial machine.

21. (Original) The modular base stated in claim 17, further comprising:

a pneumatic controller coupled to said mounting table and adaptable to communicate with said industrial machine.
